KATA PENGANTAR

Kemajuan ilmu dan teknologi kedokteran berkembang pesat. Pengembangan diri dokter menjadi penting dalam mempertahankan dan meningkatkan kompetensi, serta dapat berkiprah di kancah internasional. Banyak dokter yang mempunyai ketertarikan dan menangani kasus-kasus neuro-psikiatri, yaitu bidang psikiatri, neurologi, *neurosurgery*, *psychosurgery*, *neuroimaging*, kedokteran fisik-rehabilitasi, dan lainnya, sehingga membutuhkan wadah untuk berbagi ilmu pengetahuan dan kerjasama dalam praktek klinis.

Gangguan neuro-kognitif, neurobehavior, gangguan psikiatri dengan gangguan gerak, gangguan tidur, epilepsi, dan sebagainya memerlukan pemeriksaan klinis, penunjang, diagnosis, dan penanganan komprehensif serta menyeluruh. Oleh karena itu panitia menyelenggarakan pertemuan ilmiah pertama interdisiplin bidang Neurologi, Bedah Saraf dan Psikiatri kolaborasi praktisi/ klinisi untuk penatalaksanaan pasien yang lebih baik dengan tema **"Past, Present, and Future Neuropsychiatry in the 21st Century"**.

Kami senang hati mengundang sejawat semua untuk mengikuti acara ilmiah tersebut, dengan harapan agar sejawat dapat bertemu dengan para pakar dalam dan luar negeri, membuka wawasan, memperdalam ketrampilan, bertukar pengalaman klinis, dan bekerja sama secara profesional untuk penanganan gangguan neuro-psikiatri. Selain merupakan wadah berbagi ilmu pengetahuan terbaru, diharapkan juga dapat menjadi peluang untuk pengembangan penelitian bersama di bidang ilmu penyakit saraf, bedah saraf dan kedokteran jiwa.

Terimakasih, sampai jumpa di Jakarta.
